

Malibu Presbyterian Church Green | LEED Efforts

1. Use of Native Vegetation
2. Use of low water plants
3. Pervious Paving (Reduced Runoff)
4. Controlled storm run-off
5. High Performance Glazing (High efficiency windows)
6. Maximized Interior Daylight (Increased Natural Daylight)
7. Exterior Shading Devices (Large Overhangs) and wider window mullions
8. Interior window coverings
9. Energy Efficient Condensing units 18 SEER
10. Variable speed mechanical units
11. Stacked Buildings, Minimized Footprint VS Single Floor Sprawling Layout (This also reduces the HEAT ISLAND EFFECT)
12. Plan for future Photo Voltaic cells on roof of Admin Building
13. Reuse of theatrical light fixtures and AV equipment
14. Energy star appliances
15. High insulation values
16. Recycling/depositing of demolition materials
17. Title24 energy compliant
18. Lighting control system
19. Use of LED lighting where possible
20. Explore regional materials in design development
21. Explore recycled materials/material content in design development
22. Low Odor/Zero VOC paint specifications
23. Low-odor emitting adhesives and sealants
24. Low-odor emitting flooring systems
